

## UTILITY COORDINATION SERVICES

The NOVACOM team provides full utility coordination services through our teaming partner, CVC, Inc. The utility coordination services are provided through in-house, managed utility specialists for all power and telco coordination for your site-specific design. We *are* the in-house, utility coordination department for our client.

Services are provided through a team approach. An experienced Point of Contact oversees the operations, directing the flow of activity and working in tandem with the Project Managers and client. Our qualified and seasoned, Project Managers work directly in the field representing the team. Most importantly, we establish our presence to represent our client and our client's vision of excellence in standards and procedures. We have precisely what it takes to help you design your projects quickly and cost effectively.

### Profile
