

# Hazardous Materials Business Emergency Plan

**NOVACOM** has performed hundreds of HMBEPs for Private and Public clients alike. In performing these plans, NOVACOM's approach is to partner with the client while working with the local jurisdiction to produce a document that is both accurate and complete. Our plans are only completed after we have thoroughly reviewed the site during our on-site investigation. We document all aspects and photographing all elements, during the on-site investigation.

In addition, NOVACOM meets with local jurisdictions, ascertaining key components sought and required by the jurisdiction, thus guaranteeing a Plan that is accurate, complete, and accepted.

## Key aspects of a NOVACOM HMBEP

- ✓ Client Interview & Discussion
- ✓ On-Site Investigation
- ✓ Site Inventory Evaluation
- ✓ Regulatory Review & Interaction
- ✓ CAD drafted Site Plan
- ✓ Plan Criteria Review
- ✓ Jurisdictional Standards Review

When it comes to HMBEPs, you can count on NOVACOM to complete all aspects including placing all required signage, documenting and providing MSDS sheets, leaving a copy of the plan on site, photographing all aspects of the site investigation, conducting a methodical site review, interacting with the jurisdiction on your behalf and submitting all required documents. We will complete all of the above for one competitive price.

Our involvement does not stop there. We get you compliant, keep you compliant and maintain a database of all locations to maintain your compliance, reducing cost, and fees associated with non-compliance and compliance management. Our staff is completely versed in all aspects of HMBEPs and will evaluate each location on a site by site basis, determining eligibility for exclusion or requirements associated with the site by the local jurisdictions. Our plans are reviewed and approved by all local jurisdictions.
